

BOCOUTURE® 4 units/0.1 ml powder for solution for injection. Active substance: Botulinum toxin type A (150 kD), free from complexing proteins. Prescription-only medicine. Qualitative and quantitative composition: One vial contains: 50 LD₅₀ units of Botulinum toxin type A (150 kD), free from complexing proteins, Human albumin, Sucrose. Therapeutic indications: For temporary improvement in the appearance of moderate to severe - vertical lines between the eyebrows seen at frown (glabellar frown lines) - lateral periorbital lines seen at maximum smile (crow's feet lines) in adults below 65 years when the severity of these lines has an important psychological impact for the patient. Contraindications: Hypersensitivity to the active substance or to any of the excipients, generalised disorders of muscle activity (e.g. myasthenia gravis, Lambert-Eaton syndrome). Presence of infection or inflammation at the proposed injection site. BOCOUTURE® should not be used during pregnancy unless clearly necessary and should not be used during breast-feeding. Undesirable effects: Usually, undesirable effects are observed within the first week after treatment and are temporary in nature. Localised pain, tenderness, itching, swelling and/or haematoma can occur in conjunction with the injection. Temporary vasovagal reactions associated with pre-injection anxiety, such as syncope, circulatory problems, nausea or tinnitus, may occur. In glabellar frown lines: Common ($\geq 1/100$, $<1/10$): headache, muscle disorders (elevation of eyebrow), sensation of heaviness. Uncommon (1/1,000, $<1/100$): bronchitis, nasopharyngitis, influenza, depression, insomnia, facial paresis (brow ptosis), vasovagal syncope, eyelid oedema, eyelid ptosis, blurred vision, tinnitus, nausea, pruritus, skin nodule, muscle twitching, muscle cramps, injection site reactions (bruising, pruritus), tenderness, influenza like illness, fatigue (tiredness). In crow's feet lines: Common ($\geq 1/100$, $<1/10$): eyelid oedema, dry eye, injection site haematoma. For adverse reactions reported with the comparator product containing conventional Botulinum toxin type A complex of equal potency see Summary of Product Characteristics. Post Marketing Experience: Flu-like symptoms and hypersensitivity reactions like swelling, oedema (also apart from the injection site), erythema, pruritus, rash (local and generalized) and breathlessness have been reported. General: For undesirable effects/reactions when treating other indications with botulinum toxins and serious and/or immediate hypersensitivity reactions see Summary of Product Characteristics. Merz Pharmaceuticals GmbH, 60048 Frankfurt/Main, Germany. Date of revision of the text: July 2014. Further information is provided in the Summary of Product Characteristics and in the Package Leaflet.

Ulthera® System (CE0344) is a medical device class IIb. The non-invasive Ultherapy® procedure is U.S. FDA-cleared to lift skin on the neck, on the eyebrow and under the chin, as well as to improve lines and wrinkles on the décolletage. For indications in your country, and full product and safety information, including possible mild side effects, visit www.ultherapy.com/IFU.

Radiesse® (CE0086) is a medical device class III.
Belotero® (CE0120) is a medical device class III.

LET US
INSPIRE
YOU

A woman's face is the central focus, looking directly at the camera with a neutral expression. Her hair is pulled back, and her skin is smooth. The background is a vibrant, ethereal space scene with swirling clouds of blue, purple, and pink, and a field of small, bright blue and white stars. The overall mood is futuristic and sophisticated.

MERZ AESTHETICS

YOU
EXPECT
EXCELLENCE

WE
EXCEED
THE LIMITS

A history in aesthetics

Since creating the world's first anti-wrinkle cream in 1953, Merz has been a driver of innovation in the fast-evolving field of aesthetic medicine. As part of the Merz Pharma Group, Merz Aesthetics offers not only a multifaceted portfolio of products but also a unique range of customer services and professional training that set us apart in the field. Today, our products are used by healthcare professionals in more than 90 countries.

Our mission

Positioned at the interface between tradition and innovation, Merz, a private, family-owned company, has been committed to meeting physicians' needs for many years. With Merz Aesthetics, you can rely on a dependable industry partner. Our deep and lasting commitment to aesthetics is further proven by our recent acquisitions. Building on more than a century of healthcare expertise, we have a clear mission: We strive to improve patients' health, helping them live, feel and look better.

Enabling our partners

To enable you to achieve outstanding results for your patients, we listen and understand your needs, providing you with the best service in aesthetics by offering innovative products, cutting-edge technologies, and comprehensive customer support and training. We see ourselves as the collaborative partner – a partnership in which we aim to blend our scientific know-how with your creative artistry.

YOU MAKE ART HAPPEN

Science is our foundation

Just as you master the art of applying aesthetic medicine, we excel at the science behind it. From the earliest days of our company, we have introduced many “firsts” into the industry. Innovation at Merz is not only facilitated by research, but also by directly engaging with healthcare professionals. Through extensive in-house research and development as well as the rigorous methodology we apply to new products, we constantly strike out along new paths to help improve how you meet your everyday practice needs.

Patient safety is paramount

Your patients’ well-being is at the heart of everything we do. Merz Aesthetics products meet the highest safety requirements and regulatory standards. Backed by clinical studies and supported by a wealth of published articles, our portfolio for rehydrating, tightening, contouring, wrinkle reducing, and volumising sets the standard for evidence-based aesthetic medicine.

Measuring success

Developed by a team of multidisciplinary experts, the Merz Aesthetic Scales™ are the first globally validated rating system to objectively grade age-related skin changes. Widely used across the industry in clinical trials and daily practice, the Merz Aesthetic Scales™ address the scientific need for standardisation and provide valuable tools for scientifically managing your patients’ expectations and attesting the success of treatments.

MERZ AESTHETICS

WE
PROVIDE
THE SCIENCE
BEHIND IT

YOU DEMAND OUTSTANDING SUPPORT

State of the art training

Merz Aesthetics has recognised that learning never stops. To support you in staying on top of all developments and performing your art at the highest level, we offer you a combination of continual and certified blended-learning educational options supported by an outstanding faculty of accomplished aesthetic practitioners. With The Institute of Advanced Aesthetics™, Merz is establishing a new global training standard in the practice of aesthetic medicine to ensure the best possible patient outcome.

Engaging with experts

The annual Merz Aesthetics Expert Summit (MAEXS) is an exclusive event and global networking platform for leading professionals across all aesthetics disciplines. Top thought leaders from around the world are on hand to discuss the latest treatments, techniques and scientific developments, to help you achieve the results your patients want.

The refreshing personal touch

You take care of your patients' needs, we take care of your's. Our Field Clinical Specialists (FCS) are highly skilled clinical experts attentive to your immediate medical training needs. Visiting your clinics, they provide customised support where you need it most: in your own daily practice.

MERZ AESTHETICS

YOU
REQUEST
THE BEST
FOR YOUR PATIENTS

WE'VE
GOT IT ALL

Your patients deserve the best possible result from every aesthetic treatment. Merz Aesthetics offers you a pallet of products that allows you to focus on your art. Our broad range enables you to offer combination treatments to achieve the look your patients' desire.

Ultherapy®

ULTHERAPY® harnesses the power of ultrasound. It is the only FDA-cleared procedure that enables you to non-invasively lift the neck, chin & brow and to improve lines and wrinkles on the décolleté.

NEOCUTIS

NEOCUTIS is a range of cosmeceuticals that uses proprietary and innovative technologies for skin rejuvenation with proven clinical efficacy (PSP®, MPC®, Melaplex®, Rosaplex®, Vitaplex CTM). Besides improving fine lines and wrinkles, Neocutis also improves skin elasticity and skin firmness.

RADIESSE®

RADIESSE® is a unique calcium hydroxylapatite-based dermal filler approved by the FDA, designed for the reduction of moderate to deep lines, lifting and contouring with collagen-based volume enhancement, and for long-term improvement in skin quality.

BELOTERO®

BELOTERO® is the high-quality range of hyaluronic acid dermal fillers with patented CPM® (Cohesive Polydensified Matrix) technology that integrates smoothly into tissues. It is the ideal solution for smoothing wrinkles, restoring facial volume, and rehydrating the skin.

BOCOUTURE® / XEOMIN®

XEOMIN®/BOCOUTURE® is a botulinum toxin free from complexing proteins, indicated for the treatment of moderate to severe glabellar frown lines as well as crow's feet lines.*^{1,2}

* MR Variation approved on July 3rd, 2014. Please check your local approval status.

¹ BOCOUTURE® Common Summary of Product Characteristics, annex to approval letter July 2014.

² Indication: For temporary improvement in the appearance of moderate to severe vertical lines between the eyebrows seen at frown (glabellar frown lines) and in the appearance of moderate to severe lateral periorbital lines seen at maximum smile (crow's feet lines) in adults below 65 years when the severity of these lines has an important psychological impact for the patient.

MERZ AESTHETICS

A woman's profile is shown in a soft, ethereal light against a background of vibrant, multi-colored dust or smoke in shades of purple, blue, and pink. The woman has blonde hair pulled back and is looking slightly downwards with a serene expression.
